Summary

Business Informatics Graduate from the German University in Cairo with hands-on experience in Data Science, BI, and AI-driven system design. Proficient in Python, SQL, and Power BI, with exposure to ERP systems and digital transformation. Seeking a Data Science or AI-focused role.

Professional Experience

Data Science Intern, Masarat Misr 07/2025 – 09/2025

- Analyzed and manipulated data using SQL, writing optimized queries for reporting and decision support
- Developed interactive Power BI dashboards to visualize KPIs and business metrics
- Transformed raw data into actionable insights to support data-driven decision-making

Education

German University in Cairo (GUC), 2022 – 2026
Bachelor of Science in Business Informatics

Egyptian Language School (IGCSE) 2020 – 2022
A+ in 6 O-Level subjects & A in 2 O-Level subjects

Skills

Programming Languages: Python, Java, SQL, C#, HTML, CSS

Tools & Frameworks: Microsoft Office Suite (Excel), Power BI, SQL Server, Jira, Pandas/NumPy

Business & Management Skills: ERP Systems, Digital Transformation, Project Management, SAP System Usage, Finance & Operations Management Principles

Languages: Arabic (Native), English (Fluent), German (A2), French (A1)

Projects

AI-ERP Integration Conceptual Model, Graduation Project, Spring 2026 - Grade: A+

- Designed a Python API gateway that integrates Google Gemini 2.5 Flash for multimodal semantic extraction, which resulted in a routing accuracy of 94.0%, a precision of 87.5%, and 93.3% anomaly recall.
- Implemented Explainable AI to convert LLM inferences into auditable features, and built automated ETL pipelines that take unstructured data and convert it into a strict JSON schema.
- Applied Design Science Research methodology to design, iterate, and validate the AI-ERP integration conceptual model through statistical performance analysis and structured expert interviews

Linear Regression Mini-Project, Data Mining Course, Winter 2025

- Cleaned and preprocessed energy consumption data, handling missing values, resolving inconsistencies, and engineering predictive features.
- Developed and evaluated a Linear Regression model, addressing skewness and multicollinearity to ensure model reliability.

IT Project Management Simulation, IT Project Management Course, Spring 2025

- Created a complete Project Charter, Scope Statement, WBS, and detailed schedules using Microsoft Project.
- Simulated agile tracking with Jira.
